

Nakul bharti

Hi,Smvdu!

Basic-round 1 will be held on Sunday, [April 27, 2019 at 21:00_{UTC+5.5}](#).

You will be offered 5 problem with expected difficulties to compose an interesting competition for participants for beginner level.

The round will be hosted by rules of Hackerrank (extended ACM-ICPC). Thus, during the round, solutions will be judged on preliminary tests. I tried to make strong tests — just like you will be upset if many solutions fail after the contest is over.

You will be given 5 problems and 3 hours to solve them.

The problems are prepared by [Danish mustaque bhatt](#) , [Deepak singh rathore](#) and me. We hope you will enjoy the round. :P

My gratitude to [Sushil kanchi](#),[mrityunjay gautam](#) and [sandeep chauhan](#) for coordinating the round, [Alok](#) (special thanks for the help in preparing one of the tasks),[Keshw](#), [Deepak singh rathore](#) for testing, and also [danish mustaque bhatt](#) for the idea and preparation of one of the tasks, and of course Hackerrank for Polygon systems.

I strongly recommend you to read the statements of ALL tasks carefully (and of course, try to solve them).

Good luck!
